**Re: NJUG's Vision for Street Works**

Operating under the subsidiary names of NEDL (Northern Electric Distribution Ltd) and YEDL (Yorkshire Electricity Distribution plc) CE Electric UK is the electricity distribution business for the northeast of England, Yorkshire & Northern Lincolnshire. We are responsible for operating the network that delivers electricity to approximately 3.5 million homes and businesses across the region.

CE Electric UK is continually investing in its electricity network to improve the service it gives, aiming to provide people with a safe and secure supply of electricity, both today and in the future.

During the course of delivering this service we make every effort to demonstrate our commitment to managing high-standard street works. This is reflected in the CE Electric UK Street Care Charter. This is a public statement of our commitment to responsible street works which embraces the objectives of NJUG's vision for street works, a vision which we fully endorse.

Yours sincerely

**Phil Jones**  
President & Chief Operating Officer
