### **NJUG VISION OF STREETWORKS**

Dee Valley Water is a licensed water company operating in an area of 831 square kilometres in North East Wales and the North West of England.

We supply over 62 million litres per day to our 110,000 customers through a network of almost 2000 kilometres of water mains.

Our primary responsibility is to operate and maintain our network of assets to ensure a safe and reliable supply of drinking water to our customers. We also have a responsibility to the environment in which we operate and this includes the effect of our operations on that environment and on the society within it.

Maintaining, improving and extending our network necessitates that both minor and major works are carried out within the public highway. We understand that these works cause inconvenience to the general public and we therefore consider that the co-ordination of works in the highway is of paramount importance in reducing this impact.

As an essential utility company we fully endorse the NJUG vision in all aspects of improving the co-ordination of these works in the public highway.
