

NORTHUMBRIAN WATER LIMITED

ENDORSEMENT OF THE NJUG VISION FOR STREET WORKS

Northumbrian Water Limited operates in the north-east of England and in areas of Essex and Suffolk. We are responsible for a huge underground pipe network, much of which is under public highway, comprising 25,500 km of water pipes and 16,000 km of sewer pipes.

To ensure we deliver a first class service to our customers we must invest millions of pounds each year maintaining and improving this network.

At the heart of our business we strive to:

- Satisfy our customers and deliver affordable services
- Protect and enhance the environment
- Take a sustainable approach to all our activities
- Contribute to economic development in our region
- Improve the quality of life of the communities we serve

Minimising the disruption we cause to highway users as part of our essential work is therefore paramount. We fully endorse NJUG's Vision for Street Works working in partnership with our Highway Authorities and other stakeholders, ensuring damage to underground assets is avoided and that safety of the general public and our employees is never compromised.

John Cuthbert

Managing Director
Northumbrian Water Limited
