Dear Richard,

Support for NJUG Vision

P.J.Keary Ltd have been providing street works inspection and quality control services for Utilities and their contractors since 1991. In providing these services we have developed leading edge systems to support best practice through the provision of reliable, consistent and timely information to aid safe working and continuous improvement. With the advent of the TMA it is now even more important that we remain committed to delivering the highest possible standards in all aspects of street works.

As new members of NJUG we are delighted to pledge our support to the Vision for Street Works which fully aligns with our company objectives and we look forward to working with NJUG and its members to help deliver the Vision.

Yours sincerely

Patrick Keary
Director
