

**Wessex Water** is the regional water and sewage treatment business serving an area in the south west of England, covering 10,000 square kilometres including Dorset, Somerset, Bristol, most of Wiltshire and parts of Gloucestershire and Hampshire.

Wessex Water supplies 1.2 million customers with around 363 million litres of water a day and we take away and treat 499 million litres of sewage from 2.6 million customers every day.

Maintaining and improving this network necessitates work in the highway, a high visibility activity for our customers and the travelling public. This is our opportunity to impress and Wessex Water fully supports the NJUG vision.

All interested parties in the highway need to work together with respect for each other and their needs and this is the best way to ensure a quality job that is recognised by all.

Colin Skellett  
Chairman  
Wessex Water
